

There are several events that may affect the campus shuttle system.

Campus Closure

In the event of a full day closure there will not be any shuttle bus service.

Campus Delay

Transportation Services' goal is to have the buses in position 45 – 60 minutes before the campus opens. Example: if the campus will be opening at 10:00 am, we plan to have the buses on the route and in service between 9:00 and 9:15 am.

Campus Closure

Transportation Services will have buses in service for a limited time after the specified closure time. During a closure the main priorities will be to get passengers back to their vehicles or on campus housing. To efficiently move everyone, the buses ***will be following the route, but they will not be following a schedule.***

At the closure time, any students, visitors, faculty, and staff who are still on campus, and are in need of bus service, must begin moving to the shuttle stops as soon as possible as shuttle service will only be available for a limited period of time. Depending on the conditions, the buses may only be in service for 30 minutes after the campus closes. Transportation Services does not have the ability to provide any service after the buses go out of service.
